

Product information

G Data **AntiVirus** Business

Protects your companies data with powerful security technologies including a centrally manageable virus protection.

The complete redeveloped administrator glances with an easy to use graphical user interface. All clients, whether they are on workstations, notebooks or file servers, are controlled by the ManagementServer.

The client processes run silently in the background which ensures that users cannot change the security settings forced by the network administrator. The brand new Outlook 2010 add-in detects mails containing viruses reliably.

The idle-scan technology starts scanning your computer while it is not in use.

Award-winning security suite

- DoubleScan technology ensures best virus detection rates
- Self-learning fingerprinting and whitelisting increase pc performance
- State-of-the-art methods for detecting unknown viruses (Behavior Blocking, heuristics, CloudSecurity)

G Data ManagementServer

- **NEW!** Full ActiveDirectory support to import existing groups and to allow automatic client installations
- **NEW!** Import of foreign domain computers
- **NEW!** Dashboard for monitoring important informations (report overview, top ten infected machines and more...)
- Network-wide (LAN/WAN) Installation, virus scan, updates, settings and reports executed remotely via TCP/IP
- **NEW!** Optional Silverlight web interface
- cascable server software with outage protection
- Rollback of earlier virus signature files

G Data AntiVirus Client

- Client protection "invisible" for the user
- **NEW!** Outlook 2010 add-in for virus detection
- Email virus removal for POP3 and IMAP
- Offline mode ensures fully operational client
- Fully integrated linux clients

G Data PremiumSupport

- Hourly virus signature database updates
- New software and version upgrades
- 24/7/365 phone and email support
