

Product information

G Data MailSecurity

The virus and spam protection for your complete corporate email correspondence.

G Data MailSecurity works as mail server independent gateway solution. With version 11 we introduce the brand new AntiVirus plug-in for MS Exchange.

Your email correspondence is protected reliably from viruses, spam, phishing and other malware programs - before they reach your server.

State-of-the-art technologies

- DoubleScan technology ensures best virus detection rates
- Latest methods for detecting unknown viruses (heuristics, CloudSecurity)
- Outgoing and incoming email virus scanning

Installation as Mail Gateway

- Virus and spam filter as a mail server independent gateway solution (SMTP/POP3)
- Freely configurable content filter
- For any mail server like Exchange, Notes etc

Installation as MS Exchange AntiVirus plug-in

- For Microsoft Exchange 2007 / 2010
- Adaptable to already existing ManagementServers

G Data PremiumSupport

- Hourly virus signature database updates
- New software and version upgrades
- 24/7/365 phone and email support
